---

The LME got an iPod nano for V-day. This is our first mp3 player for either of us so it's been an adventure. I am currently loading all of my CD's into my computer. I'll probably be buying a terabyte of storage later this week.

The little iPod is an amazing device. It is incredibly small, has a built in radio and stores 8 Gb of data. This is the kind of innovation that a free market produces.
